Issues in Information Security :-

Legal issues :-

1. Data protection Law :-

Various countries have laws governing how organization handle personal data. non compliance can lead to legal consequences and fines.

eg :- GDPR in europe
HIPAA in US.

2. Intellectual property rights :-

protecting software, patents and trademark is crucial.

unauthorized use or theft of intellectual property can result legal action against the organization.

eg :- if any patent logo was used by other company, they can take legal actions.

3. cybercrime Laws :-

Laws define cybercrimes and prescribe penalties for offenses like hacking, data breaches and unauthorized accus.

Organization adhere to these laws to avoid legal actions.
